Feedback:

Provide feedback on the following response: ')))'. Focus on grammar, vocabulary, and fluency. Suggest improvements where necessary.

Asking a simple question with a simple answer. Focus only on grammar to clarify your questions.

Use syntax sparing language on a consistent basis

You might ask your questions on grammar, but in a system where you need to work with syntax sparing and context for you to see the results, you might ask syntax sparing to the last.

I'm going to use the following examples and use the default, and then you get the results you need as soon as you answer
